

Cedar Sinai Medical Center Los Angeles, CA

Interior noise levels & sound isolation MEP noise isolation

Client

HOK, Los Angeles

The new Advanced Health Sciences Pavilion integrates clinical care and scientific research in a single building. The flexible building will house translational research labs as well as outpatient centers of excellence, clinical functions and outpatient procedure centers. A plaza level will feature an educational center, café, pharmacy, blood lab and imaging facilities.

Location

Los Angeles

The anticipated LEED Gold design features materials that are environmentally friendly and energy-saving while also allowing for light and openness.

Completion

2013 (estimated)

The scope included:

Total Building Area

450,000 sq. ft.

- Exterior façade noise design
- Interior sound isolation design
- MEP noise control design
